

Mobile Irrigation Lab

Free Irrigation Evaluations

A mobile irrigation lab is an evaluation of irrigation systems that includes on-site system analysis and technical assistance to improve water use efficiency for farmers in San Luis Obispo County.

This voluntary, confidential, and non-regulatory approach to water conservation is offered as a free public service, while funding is available.

Improving your Distribution Uniformity can benefit you by:

- Increased Crop Yield
- Lower Energy Costs
- Reduced Water Usage
- Reduced Pollution and Runoff
- Lower Pesticide Costs
- Environmental Improvement

The Evaluation

- The Mobile Irrigation Lab (MIL) technician will schedule an appointment for an evaluation with agricultural producers
- The evaluation includes on-site observations and measurements of the system for flow and distribution uniformity (DU)
- A confidential written report is provided, and improvements and recommendations are discussed with the producer
